G T Inc. / Cepek Wheels

Approved wheels for use on the AM General H1 and Humvee.

All GT Wheels listed below, are built specifically for, and are approved for use on the AM General H1 and Humvee by GT Inc.

The available GT wheels are rated to carry 4500 Lbs. each wheel, which is 400 lbs. per wheel more than the 4100 lbs. per wheel load capacity, on the factory one piece and two piece aluminum wheels, installed on the commercial version H1 by AM General.

The GT 8.25" X 16.5" wheel is no longer in production and has not been since November of 2003 due to lack of request for this size wheel, based mostly on the introduction of the 17" wheel in December 1999 and the 18" sizes in June of 2004.

There are only two manufactures building and approving their wheels specifically for use on the H1 and Humvee, G T Inc., and the AM General factory wheel.

Wheel Mfg.	Wheel Size	Backside Setting
GT/Cepek	8.25" X 16.5"	7.0" Backside Setting
G T Inc.	17" X 8.5"	7.0" Backside Setting
G T Inc.	18" X 8.5"	7.0" Backside Setting
G T Inc.	18" X 9.5"	7.0" Backside Setting

Although there are some aluminum wheels that will bolt up to the Hummer H1 and Humvee, they are not approved by their respective manufacturers, nor do they have the correct offset or load capacity used by AM General for either the 10,300 lb. GVW or the 12,300 lb. GVW Hummer.

If you have any questions concerning GT wheels, please feel free to contact us directly at 1-949-394-1578 or hummerproducts@cox.net.

Sincerely,

G T Inc.
